

TOOLROOM

A designated area effectively and efficiently handle, store, control and maintain specialty items so that it can be properly organized, monitored, managed and kitted along with other materials.

Unnecessary downtime? Job delay?
Long job setup time?
Obsolete inventory?

WHY??

- × Lack of availability and poor operating condition of items
- × Bad planning and scheduling items for a job.
- × Bad item flow tracking.

Main reason... **Absence of Toolroom??**

Minor changes, major effects:

- One efficient system to replace multi manual records at ease.
- Real-time inventory updates & overview ease items scheduling.
- Detailed transaction record for item flow tracking.
- Extra quick guidance and tight control with smart cabinet.
- Expandable and ready to integrate with third party system for future development.

Transparency, Traceability, Control, Management

QOTD:

Tooling is often described as the "heart" of the business, although it's only a small part of companies turnover, it's what in there contribute to that turnover.
